

## ABBYY PDF Transformer 3.0

### Product Overview

ABBYY PDF Transformer 3.0 is an easy-to-use PDF utility for quickly converting, creating, editing and saving any type of PDF document. Based on award-winning ABBYY OCR technology, this sophisticated PDF conversion solution turns PDF files into fully formatted, editable documents—in 184 languages. With one click, easily convert or create PDFs to or from Microsoft® Office applications or use Windows Explorer to do it—either way, it's easy and fast!

ABBYY PDF Transformer 3.0 boosts productivity for anyone who uses PDF files. This powerful, easy-to-use program helps users to:

- Quickly access the content of a PDF to edit or repurpose by converting it to a Microsoft Office format
- Easily convert any existing Office document into a PDF file to send as an attachment
- Make scanned PDF images searchable

With accurate conversion that retains document layout and structure, PDF Transformer 3.0 virtually eliminates the need for reformatting. It also comes with enhanced editing and security features designed to prevent unauthorized access to sensitive information. Featuring superior MRC compression and PDF/A support, PDF Transformer 3.0 optimizes PDF output for easy file sharing and long-term archiving.

PDF Transformer 3.0 is a versatile and easy-to-use solution that quickly and cost-effectively boosts office productivity.

### Key Features and Benefits

ABBYY PDF Transformer 3.0 is an easy-to-use yet powerful tool that delivers versatile functionality in one application—PDF conversion, creation and a range of options for combining, securing and modifying PDF documents for maximum productivity.

#### Key Features

### PDF Conversion

#### Process Any PDF file

PDF Transformer 3.0 processes any type of PDF file, including scanned (image-only) PDFs, searchable PDFs, PDFs produced from applications, password-protected PDF (PDF password required), PDFs with text in non-standard encoding, tagged PDF and PDF/A.

#### Full Layout Retention

When converting PDF files to Microsoft Office formats, PDF Transformer 3.0 not only captures text (horizontal and vertical) but also retains all native formatting elements. Retain true text flow, titles, pictures, charts, headers, footers, page numbering, footnotes, fonts, font styles, long tables and captions across all pages of a document—virtually eliminating the need to retype or reformat documents.

#### Multiple Language Support

PDF Transformer 3.0 automatically detects document languages and can accurately convert multi-lingual documents in 184 languages—in any combination.

#### One-Click Conversion from Microsoft Office Applications

PDF Transformer 3.0 allows the quick conversion of PDF files to Microsoft Office documents within these applications. Even converting multiple PDF files to Microsoft Word, Excel or searchable PDFs is a simple one-click process.

#### Convert Scanned PDFs to Searchable PDF files

PDF Transformer 3.0 converts image-only (or scanned) PDFs to searchable PDF or PDF/A files in one step. By adding the text layer to image-only PDF files, these files can now be key-word searched for efficient electronic storage and retrieval of scanned information like magazine articles, contracts, books, etc.

## PDF Creation

### Integrated with Microsoft Office Applications

Easily create PDF files directly from Microsoft Word, Excel, PowerPoint or Visio using the embedded toolbar. Simply save the file, directly email the PDF or append the active document to an existing PDF.

### Combine Multiple Files into One PDF

Automatically combine several files of different formats (Word documents, Excel spreadsheets, PDF files and more) into one PDF document. Each file's content will begin with a new page in the resulting PDF. Appending a document to any existing PDF is as easy as one mouse click.

### MRC Compression

Ideal for document sharing, archiving or easily email PDF documents and save memory by compressing PDF files up to 10 times their original size with ABBYY's powerful new MRC (Mixed Ratio Content) compression technology.

### Retain Links, Hyperlinks and Metadata

When creating a PDF file from a Microsoft Office document, accurately retain hyperlinks, internal links and document metadata, such as author, title, subject, keywords, etc.

### Print-to-PDF Function from Any Windows Application

Create a PDF file from any Windows application that supports the "Print" function by simply printing a document choosing "PDF-XChange for ABBYY" in the Printer Name dialog box.

## PDF Editing

### Bates Numbering

A flexible Bates numbering tool can add any combination of date/time, static text and/or Bates numbering to incoming documents. It's an ideal tool for companies to easily add unique identification and/or Bates stamping on documents during the e-discovery and litigation preparation processes.

### Customized Stamping

Easily mark and identify documents with copyrights or status by applying customized stamps with any text, position or color.

## PDF Security

### Create Secured PDF Files

Create secured PDF files by setting a password for opening the file or creating permissions passwords to restrict certain operations, such as printing, content extraction, editing and adding/removing pages.

### Redaction of Sensitive Information

Block any sensitive information from being viewed or searched with an easy-to-use redaction feature. Simply click on the Redaction icon from the toolbar and use the mouse to draw around the area of sensitive information (both text and image) to be blocked from view or search.

### Encryption and Digital Signature

Output PDF documents with additional security settings with PDF Transformer 3.0's print-to-PDF function. Print documents from any Windows application by selecting "PDF-XChange for ABBYY" printer, and simply apply encryption (40-bit, 128-bit or 128-bit AES) to protect important documents or add a digital signature for authentication.

### Convert PDF to Multiple Formats

PDF Transformer 3.0 allows users to convert PDF files to:

- Microsoft Word 2007/2003/XP (DOC, DOCX)
- Microsoft Excel 2007/2003/XP (XLS, XLSX)
- Rich Text Format (RTF)
- TXT
- HTML
- PDF/A
- Searchable PDF (text-under-the-page image)
